Job Title Fullstack Web Developer

Department R&D

Reports to the Technical Director

About Equicty

Equicty is the market leader in online horse management solutions. Our purpose is to make equestrian's life easier by automating your key business activities in order to save time to focus on what's truly important: managing your horses. Customers refer to our tool as a virtual assistant and that's exactly what we want to become. The supporting factor in your stable no matter the size, discipline or activity focus.

Our goal is to provide a support for anyone active in the horse industry, whether you are a sport stable, trader, breeder, riding club or even medical professional.

After we have successfully gone through the market – fit phase and delivered proof of concept in Belgium, we are now evolving from a start-up to a scale-up while going global with huge ambitions.

As Fullstack Web Developer you will help us from the start:

- By contribute to and ensure the delivery of new software components of existing products with thousands of users;
